Grade 8
[Pacing Guide](#)

Unit	1	Unit Title:	Fitness Through Movement	Pacing:	5 Days
Unit Summary: Fitness involves many different aspects of movement. In this first unit of eighth grade Physical Education, students assess their current fitness level and apply FITT principles to create a plan for improving their own fitness. Additionally, students study how movement is used throughout the world to reflect cultural traditions and beliefs. Finally, students build movement skills in isolated practice and applied settings, revising movement sequences or dances in response to teacher and peer feedback.					
Essential Question: How can I plan for fitness at any age? How can the transition of movement skills from isolated settings (skill practice) to applied settings (games, dance) occur? How do different cultures use dance and movement as a form of expression?					
Objectives: - Analyze and reflect on personal health data (HR monitors, pedometers, fitness assessments) to create and implement a comprehensive health and fitness program (wellness) applying the FITT principles. - Demonstrate a planned movement sequence that incorporates feedback from teachers and peers. - Identify, describe, and celebrate the influence that different world cultures have on games, sport, and dance.					
NJSLS-CHPE Standards: 2.1.8.PGD.1, 2.1.8.PGD.4, 2.2.8.LF.5, 2.2.8.PF.3, 2.2.8.PF.5, 2.2.8.MSC.2, 2.2.8.MSC.3					
Interdisciplinary Connections: SL.PE.8.1

Overview of Activity/Focus	Instructional Materials	Technology Infusion
- Establish physical education routines and rules for outdoor and gymnasium spaces. - Assess students' fitness levels. - From their data and the FITT principle, have students create a comprehensive health and fitness program that uses technology to monitor progress. - Explore different cultural dances and movement sequences, such as the Maori Haka, to see how movement is used for celebrating, memorializing, and motivating. - Conduct movement activities such as dance or aerobic routines to practice movement sequences. - Create a movement sequence that reflects feedback from peers and teachers. - Conduct drills, relays, and games based on sports such as football, soccer, and basketball to strengthen movement sequences and coordination in applied settings. - Conduct yoga-like movements such as crescent moon, tree, downward dog and butterfly during warm ups and cool downs. Unit	2	Unit Title:	Fitness in Cooperative Activities	Pacing:	9 Days
Unit Summary: In this unit students explore the benefits of individual versus collaborative decision making skills in a variety of cooperative activities and sports. Additionally, they hone their ability to think critically as a member of a group and assess their contributions to the success or failure of the group in tasks or activities. Finally, students explore the consequences anabolic steroids and other performance enhancing drugs can have on the bodies of individuals seeking a competitive edge.					
Essential Questions: How do I work effectively as a member of a group? How can practicing specific skills enhance one's ability in a game setting? How can short and long-term goal setting affect an individual or team's performance?					
Objectives: ● Determine and evaluate the short and long term effects, including the consequences, of the use and abuse of anabolic steroids and other performance enhancing drugs. (i.e. physical, behavioral, legal, and ethical). ● Compare and contrast the benefits of individual versus collaborative decision making skills in a variety of cooperative activities and sports. ● Analyze and assess personal behavior including communication, respect of others' ideas, decision making, and attention to safety during cooperative activities. ● Analyze individual and team effectiveness strategies in achieving a goal and assess performance utilizing critical thinking skills and make recommendations for improvement. ● Identify and assess the effectiveness of personal critical thinking strategies that are implemented to complete tasks and to improve group performance.

Overview of Activity/Focus	Instructional Materials	Technology Infusion
- Discuss body image and some individual's pursuit of the "perfect" physique, leading them to steroids. Watch a video on the dangers of steroids. - Practice cooperative games and activities such as Skywriter, Tarp Challenge, or Caterpillar Race to build group cooperation, strategy, and communication skills. - Apply cooperative and movement skills in sports and games, improving performance in response to feedback. - Participate in self and group assessment of performance to improve outcomes. - Conduct yoga-like movement through warm-up and cool-down activities such as tree, downward dog, butterfly and crescent moon. - Track data and create an explanation of personal fitness goal progress. Unit	3	Unit Title:	Developing Individual Performance	Pacing:	4 Days
Unit Summary: Strong individual performers know how to incorporate feedback into training and practice while maintaining mental agility and toughness. In this unit, students work independently and with partners to strategize ways to improve their individual fitness and movement skills. Applying different training techniques and using strategy to improve their performance, students participate in a variety of activities utilizing movement and manipulative skills.					
Essential Questions: What can I do to improve my performance in fitness and in games? How can strategy aid in individual and group success? How do mind and body work together for athletic or fitness success?					
Objectives: ● Compare and contrast the impact of offensive and defensive strategies that could affect performance in individual and dual activities. ● Analyze the effectiveness of mental strategies and skills used to achieve specific goals (accuracy, sportsmanship, game plan) during game play. ● Describe the proper equipment, rules, and procedures that will promote participant safety when engaged in practice/play in individual and dual activities. ● Define appropriate fitness training strategies (skill-related fitness components) and exercises needed to participate successfully and efficiently in individual / dual activities.

Unit	4	Unit Title:	Fitness in Team Activities	Pacing:	9 Days
Unit Summary: In this final unit of eighth grade Physical Education, students participate in team activities to evaluate their performance, strategy, and sportsmanship in order to develop a plan for more successful and enjoyable team experiences. Viewing team activities through a historical lens, students evaluate how activities and sports have adapted over time to address technology/equipment changes, safety concerns, and player/fan enjoyment. Finally, students apply their knowledge of skill and health related fitness to create a plan for an active summer.					
Essential Questions: How does fitness impact team activities? Why is it essential to know the rules of the game? How are communication and strategy important for team activities?					
Objectives: - Analyze and reflect on personal health data (HR monitors, pedometers, fitness assessments) to create and implement a comprehensive health and fitness program (wellness) applying the FITT principles. - Analyze and explain the effectiveness of specific defensive strategies implemented against various offensive tactics. - Demonstrate the ability to integrate performance/strategic recommendations to improve both individual and team effectiveness during team activities and games. - Identify and conduct a self and peer / team sportsmanship assessment of appropriate sportsmanship behaviors of participants and observers. - Develop and implement the strategies based on the team sportsmanship assessment to improve the overall class sportsmanship and safety behaviors. - Analyze how various types of equipment and products, and changes to rules and procedures, have had an impact on the					

evolution of safety in specific team activities and sports.

Career Education: 9.2.8.CAP.3		
Overview of Activity/Focus	Instructional Materials	Technology Infusion
- Through articles/videos and personal experiences, explore the differences between practicing a skill versus a sport and training for endurance versus performance. - Through study of changes to college and professional sports rules, examine how activities and sports have adapted over time to address new technology/equipment, safety concerns, and player/fan enjoyment. For example, students could study how baseball and football have changed play review or playoff rules to increase fan enjoyment. Then change a rule in a game for enjoyment. - Play a variety of team games and sports such as soccer, Pickleball, Whacky Baseball, and Handball to develop strategies for offense and defense and practice applying rules and sportsmanship. - Create individual data-based fitness plans to remain active over summer vacation.
