When California is dry, we're all in a drought

Whatever fruits and vegetables you put on your plate, chances are good that you're eating produce from California. That's why the long-lasting drought in California affects everyone, all over the United States. This map shows the extent of the drought as of the 10th of April 2025 -- and we're pretty much at the end of the California rain and snow season.

VEGETABLE OF THE MONTH
Corn
Among the fantastic fresh summer foods we all anticipate, fresh corn on the cob is certainly a favorite. Technically, corn is a grain, but most often we use it like a vegetable. In most parts of the U.S., fresh sweet corn season is in full swing from July through September.

ENJOY YOUR SUMMER!
