		This project is a renovation of two full bathrooms to be completed in sequence. Both are on the main level of the house. There will be no footprint change and therefore no structural work. All fixtures will be replaced in existing footprint. I will confirm or install proper exhaust ducting. All insulation will be updated. Electrician and plumber to pull separate permits. 									Remove existing sump pump and pit. Find footing drains and reinstate them to a new pit with irrigation box and 3/4" stone. Install 2" PVC overflow pipe from irrigation pit to new sump pump pit. Keep overflow pipe as high as possible (in slab or just under slab to stay above normal groundwater level). Install quiet check valve on backup sump pump. **MDC**

		of electrical wiring and condensate piping. The 2nd and 3rd floors will include a new indoor air handler in the attic crawl space and an outdoor unit in the back of the building. We will add a zoning system providing individual control of the 2nd and 3rd floors. A new thermostat will be added to the 3rd floor level. The ductwork throughout the 3rd floor crawl space will be heavily modified. The refrigeration piping will be reused, includes reconnection of the electrical wiring and condensate piping. Includes the new zoning system with new thermostats. These systems can provide each individual floor with efficient heating and cooling. You would still need to rely on the existing fossil fuel boiler to the heat the entire building when outdoor temperatures drop below 30 .
