Dear Parents and Guardians,

Beginning May 6th through May 14th, your child will participate in End-of-Year MAP® Growth™ testing from NWEA®. This computer-based assessment helps measure both academic progress and growth since the beginning of the school year.

MAP Growth is a unique, adaptive assessment that adjusts to each student's responses, providing a personalized measure of what they know and what they're ready to learn next. This end-of-year test is especially valuable because it allows teachers and parents to see how much academic progress a student has made over time.

Students in grades 1 through 8 will be assessed in Reading and Mathematics, with 5th and 8th graders also taking the Science assessment.

Results help teachers make data-informed instructional decisions and provide families with a clear picture of their child's academic growth. Following the testing window, you will receive a Family Report summarizing your child's performance from the beginning to the end of the school year.

Sincerely,

Mrs. Wilder
