THE MILE

711 W Avenue I, Midlothian, TX 76065

Principal: Shannon Blake, Ed.D.

The MILE (Midlothian Innovative Learning Experience) is a state-of-the-art educational facility that provides flexible learning spaces that reflect current industry and workplace environments.

Programs at this building give students an opportunity to utilize industry-standard equipment and professional practices in a career path which the student has interest. Learning and coursework at The MILE is provided by a highly qualified, passionate teaching staff enhanced by regular mentoring and curriculum support from professionals in the correlating industries.

CAREER AND TECHNICAL EDUCATION PATHWAYS

- Culinary Arts
- Cybersecurity
- Aerospace Engineering
- Civil Engineering
- Entrepreneurship
- Video Game Design
- Law Enforcement

These learning spaces replicate the real world and will compliment a student's learning experience provided at their home campus.

CULINARY ARTS students work in an industrial kitchen operating a bistro that is open to the public.

CYBERSECURITY students utilize a fully functional lab with routers and switches learning to prevent hacking and perfecting technical skills in securing data.

AEROSPACE AND CIVIL ENGINEERING students have access to a student-centered makerspace filled with high-tech and common materials and tools.

ENTREPRENEURSHIP students thrive in the INCubatoredu curriculum where they work to develop solutions to products and services missing from our community, create a business plan and pitch their product to a Board of Investors, Shark Tank-style.

VIDEO GAME DESIGN students create a game from the ground up. They have full control of the development of their storyline, the setting, and the characters using programs such as Unity and GDevelop.

LAW ENFORCEMENT students explore the field of criminal justice. They learn foundational knowledge about how the criminal justice system operates, its key components, and its role in society.
