IB Global Conference

How do we remain connected in this era of constant change? As global educators, we are united by our humanity. Through this connection, we have profound impact on students, school communities, and the world. Addressing challenges to teaching and learning requires a priority on new skills and competencies young people need to flourish academically and beyond, a focus on the unique human qualities and capabilities of self-awareness, empathy, and innovation. We are human first, deeply connected to each other and the planet. If we keep this ideal at the forefront of our work, we can adequately prepare students to face an uncertain future with hope and resilience. [Learn more here](#)

Engaging Diverse Worldviews in Contested Times: Theory and Practice

In this course, we will critically examine theories of “worldviews” – defined as systems of beliefs that inform how we come to understand, and live in, the world. We will engage contemplative pedagogy to explore the nature of our own worldview and how it may shape what we personally value and the sources of information we find legitimate. We will also deepen our capacity to facilitate complex moments of disagreement and tension as part of re-affirming how schools in a diverse, democratic republic can be places where student worldviews of all kinds are welcomed. Open to ACSD staff and faculty. Interested? Contact Professor Miller-Lane directly for more information and course schedule. jmillerl@middlebury.edu.
