Total credits needed = 24

Additional Information

Students may earn additional elective credit by completing volunteer, community service, or work hours outside of school. These hours must be completed during the school year and can total a maximum of 320 hours to earn up to 2 elective credits. Volunteer and community service hours must be documented on a volunteer sheet and work hours at a job may be turned in through pay stubs. Students interested in completing volunteer or community service hours can see Mr. Jaggers for a volunteer sheet. Volunteer work cannot include tasks performed for family members.

In addition to these graduation credit requirements, students will need to show college and career readiness in Math and English through one measure listed in the attached Colorado Department of Education menu of options by their senior year.
