

COLTON JOINT UNIFIED SCHOOL DISTRICT

Purchasing Department

ADDENDUM NO. 1

25-018JB Purchase of (1) New Warehouse Delivery Truck

May 12, 2025

Response to Questions for Bid No. 25-018JB

Question 1: In order to avoid current 25% tariffs in effect on new International orders (which would equate to approximately \$25,000 added to the chassis price), would the District be open to purchasing a new 2025 International MV607 with the attached specs? We have this particular truck in stock and ready to go (without any added tariffs and without the 3–4 month wait for International to manufacture the chassis).

District Response: *The district is not interested in the MV607 and would like to continue with the original specifications.*

Question 2: Morgan's engineering team is saying .38" is the thinnest plywood wall that they offer which will provide an interior width of 98.12". Is this acceptable to the District? If not, Morgan offers a van body constructed of Morganplate in lieu of aluminum walls with plywood. Morgan states that they can get you additional interior width if you would like to go with Morganplate body.

District Response: *Yes, the .38" is acceptable.*

Question 3: Morgan states that the RGL liftgate is no longer available. It has been replaced by the WDV-45 model with a maximum platform size of 72"x88". I have attached a brochure for the WDV series. Is the District okay with this replacement model?

District Response: The District has been informed that the **Waltco RGL liftgate** has been discontinued. After evaluating available alternatives, the District confirms that it **prefers the Maxon RC liftgate with a steel platform** as the accepted substitution.

Question 4: E-Track – Are they looking for (2) row of (4) rows on each side?

District Response: *Two (2) horizontal rows of E-Track on each side wall of the truck interior, for a total of four (4) E-Track rails — two per side.*

Question 5:

The Waltco RGL liftgate has been discontinued. Which liftgate would the customer like to go with, the Maxon RC or BMR?

District Response: The District has been informed that the **Waltco RGL liftgate** has been discontinued. After evaluating available alternatives, the District confirms that it **prefers the Maxon RC liftgate with a steel platform** as the accepted substitution.

Respectfully,
JoAnn Baeza
