CHROMEBOOK TIPS

- Charge Nightly: Plug in your Chromebook every evening so it's ready for school the next day.
- Restart Weekly: Restarting your Chromebook once a week helps keep it running smoothly.
- Keep It Clean: Gently wipe the screen and keyboard with a soft cloth—no food or drinks near the device.
- Use School Accounts Only: Students should log in with their school Google account to access learning apps.
- Close Tabs When Done: Too many open tabs can slow things down—remind students to close them when finished.
- Report Problems Early: If the Chromebook isn't working properly, let your teacher know right away.

PROGRESS BOOK

ProgressBook is the district's online gradebook and student information system. It allows parents and students to stay updated on grades and attendance.

HOW TO LOGIN

1. Visit: <https://www.buckeyeschools.org/parents>
2. Click ProgressBook Parent Access to log in.
 - First time logging in?
You'll need the registration key that was emailed to parents/guardians.
If you need one, you can request one [HERE](#).
3. View grades, attendance, assignments, and teacher comments.

PROGRESSBOOK TIPS

- Check weekly to stay informed without feeling overwhelmed.
- Review ProgressBook together with your child to encourage meaningful check-ins. Use it as a conversation starter. "I was looking at your ProgressBook—how are you feeling about how things are going in school?"
- Reach out to teachers if you have questions. Encourage your child to self-advocate when appropriate.
- Remember: ProgressBook offers a snapshot in time. One low score may just be part of the learning process—look for patterns over time to get a fuller picture of how things are going.
What to watch for:
 - Overall grade trends
 - Teacher comments
 - Assignment completion

RESOURCES TO SUPPORT LEARNING AT HOME

INFOhio is a free digital resource provided to all Ohio students, offering access to high-quality educational tools, eBooks, videos, and learning activities for every grade level. It's available from home or school and supports learning in multiple subject areas. Parents can explore INFOhio with their child to reinforce classroom learning and spark curiosity at home. Visit the Parent & Families page [HERE](#).

Watch this short video to learn how INFOhio's high-quality resources can support student learning at home (Grades K–12).

HOME INTERNET

Families have options for discounted internet service through the FCC's Lifeline Program. This program provides eligible households with a monthly discount of up to \$9.25 on phone, internet, or bundled services. To learn more and check eligibility, visit www.lifelinesupport.org, or contact a participating internet provider. Please note that not all internet providers offer Lifeline discounts.

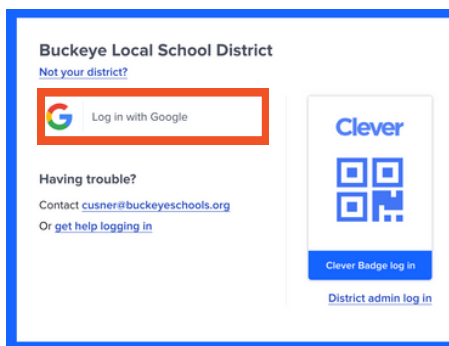

CLEVER

Clever is a platform that gives students one-click access to all their digital learning resources with a single login—no need to remember multiple passwords! Students can log in from home to access classroom tools and educational apps.

HOW TO LOGIN

1. Go to our district's Clever Portal
<https://clever.com/in/buckeyelocalschools>
2. Select "Log in with Google".

3. Students use their Google email and password to login.

CLEVER TIP

Connect with your child's teacher to learn which apps are available and get ideas for how to support classroom learning at home.

STAY CYBER-SAFE

- Keep Passwords Private: Help your child learn that passwords are like toothbrushes—just for them! Don't let them share their login info, even with friends.
- Check In Often: Sit with your child while they're online or ask them to show you what they're working on. Keeping it open builds trust and safety.
- Think Before You Click: Teach your child to avoid clicking on unknown links, pop-ups, or downloading files they don't recognize.
