## FY2017 - FY2027 CAPITAL PLAN

**Contact Information: 561-434-8042**

On September 7, 2016 the School Board of Palm Beach County adopted the FY2017 – FY2027 Capital plan with and without sales tax. The Plan is developed in accordance with the Florida Department of Education guidelines. It contains both construction and non-construction projects. The District staff utilizes the adopted plan in ensuring sufficient capacity

is in place to meet the students' needs in the best facilities the District can afford with upgraded technology and a safe environment.

The School Board also approved the FY2017 Tentative Education Facility Work Plan on September 7, 2016, as required by F.S. 1013.35.

The Intergovernmental Plan Amendment Review Committee (IPARC), made up of Planning Directors in Palm Beach County, reviewed the five-year projected enrollment, school utilization and capacity solutions, and had no objections.

## Facilities Overview

### *Five-Year Plan & Capital Budget*

## Facilities Planning & Intergovernmental Coordination

**Contact Information: 561-434-8042**

School facilities Planning ensures that the best space the District can afford is provided to each and every student. This process starts with effective planning commencing at the time of the October FTE and continuing until the Capital Plan is adopted in September. The Plan must be balanced and feasible to address necessary maintenance, technology improvements, replacement of portables and enrollment relief at schools and at the same time adhering to CSR requirements.

Due to budget constraints, the District has very limited projects it is pursuing. The focus of the District is towards facility renewal of older schools to meet the changing needs of the students. Neighborhoods are being redeveloped and students returning to their home school. This trend requires the schools in these redeveloping areas to be maintained and sometimes capacity added to meet demand. Due to changing population, shifts in development and economic trends, there is also need for additional capacity in growing areas of the County which must also be addressed through capital planning or balancing enrollment by conducting program or boundary changes.

As the District faces challenging times due to scarce financial resource, the Capital Plan contains minimal funds for capital projects and is focus mainly on minor maintenance projects. This trend, if continue will cause our schools to deteriorate and make it even more difficult to get caught up with maintenance and meeting other educational demands.
