TigerMe
DREAM.PLAN.SUCCEED

PRODUCT DATA SHEET

TECHNICAL SPECIFICATION

TigerMe

Product Name:
TigerMe

Product Category:
Software

KEY FEATURES
Product characteristics

01

AI-Powered Admissions Probability Engine
The software uses proprietary artificial intelligence modeling to evaluate a student's chances of admission by analyzing their entire academic profile including grades, test scores, extracurriculars, and demographics offering personalized, data backed insights into where they stand with various institutions.

02

Tailored Academic Planning and Remediation
Based on individual student data, the TigerMe platform delivers customized academic planning and targeted remediation strategies, helping students address weaknesses and build competitive profiles aligned with their desired colleges or universities.

03

Real-Time Adaptation Using Live User Data
The platform continuously learns and evolves by analyzing real time trends and user behaviors, ensuring that its recommendations stay current and strategically aligned with changing admissions landscapes.

PRODUCT
Overview

By combining the precision of artificial intelligence with real time data analysis, our platform transforms how students prepare for higher education.

A Strategic Edge in College Admissions
What sets TigerMe apart is its ability to learn and adapt in real time, using live data and user behavior to refine its recommendations and stay aligned with evolving admissions trends. This dynamic intelligence gives students an unparalleled advantage and creates a scalable, defensible solution in a high demand, high growth market. TigerMe represents a compelling opportunity at the intersection of education, AI, and personalized learning. We are building not just a platform, but a category defining tool that empowers students to make informed decisions, unlock their full potential, and succeed on the path to higher education.

Reasons to choose TigerMe

01.
Leveling the field

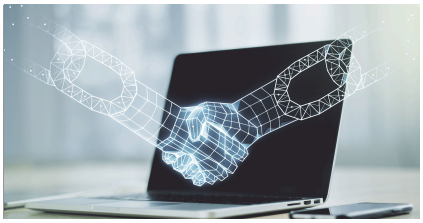

By providing an affordable, AI driven platform, TigerMe delivers personalized, data driven guidance to help students navigate the complexities of college admissions. Our solution ensures that every student, whether they come from underprivileged backgrounds or have limited access to professional advising, receives the support needed to build competitive applications and increase their chances of acceptance.

02.
Enhanced school support

TigerMe is not a tool that replaces the human touch in college advising; rather, it enhances the ability of school staff to serve more students with greater efficiency and accuracy. By automating data analysis, providing real time insights, and delivering personalized recommendations, TigerMe frees up time for school staff to focus on more complex, personal interactions with students while ensuring that each student's journey is guided by data backed decisions.

03.
Strategic partnerships

Our partnerships with Instructure, makers of Canvas, the number one LMS, and AWS reflect TigerMe's commitment to delivering reliable, scalable, and secure solutions. These collaborations reinforce our reputation as an innovative, trustworthy platform for academic career planning. With support from these industry leaders, TigerMe is poised to evolve and adapt to the ever changing needs of students, schools, and partners empowering more students to **Dream, Plan, and Succeed**.

TECHNICAL CHARACTERISTICS

Product Characteristics	Educational Institutions	Students	Partners
AI-Powered Insights	Targeted support	Informed decisions	Current relevant and responsive
Personalized Academic Roadmap	Maximize resources	Reduces stress	Value added ecosystems
Real-Time Adaptation	Early intervention	Reduces risk of missed opportunities	Scalability
Probabilistic Admission Forecasting	Advances equity and access goals	Strategy driven	Predictive analytics
Seamless Integration with Leading Education Technologies	Built to scale	Enhances equity through built-in accessibility	Reliability

Empowering Student Success, Together

For institutions, partnering with TigerMe means extending the reach of your counseling and support services without adding administrative burden. Seamless integration with trusted platforms like Canvas and AWS ensures a smooth experience, while real time insights help identify at-risk students and close achievement gaps early on. Together, we can build a more equitable, student centered future where every learner has the opportunity to **Dream. Plan. Succeed.**

Scalable, Mission Driven Innovation in EdTech

TigerMe combines advanced AI technology with a mission driven approach to student success, making it a valuable partner for organizations seeking impact and scalability. As a certified partner of Instructure (Canvas) and AWS, TigerMe offers a secure, reliable, and easily integrated platform that evolves with user behavior and real-time data.

52% **Of high school students report difficulty receiving accurate guidance**

1 in 8 **students are abandoning college dreams due to application stress**
