River Bluff Campus

Get ready to take a seat and watch the game – the bleachers are installed in the River Bluff gym! Installation of the bleachers marks the completion of the interior finishes at the River Bluff addition, allowing for punch list and final clean activities to begin. In the coming weeks, we will work on putting the finishing touches on this beautiful space!

Outside the building, site work continues at the River Bluff Campus. Installation of the curb and gutter was completed this week as sidewalk pours continue. Next week, topsoil will be set site-wide, making way for landscaping to begin following Memorial Day.

Early next month, we will begin our phased renovations of the remainder of the District Office, which includes new flooring and paint throughout the building!

High School

It's full steam ahead on the High School pool renovations! As demolition of the existing pool deck tile continues, preparations are underway in the locker rooms for the fluid-applied epoxy flooring that is set to pour next week. Items like the competition starting blocks, benches, and other fixed accessories have been removed and will be replaced later this summer. In the coming weeks, demolition of the perimeter clerestory windows in the pool will begin which will also be replaced this summer.

Mechanical upgrades continue throughout the High School. In the coming weeks, the air-handling units (AHUs) servicing the auditorium and the field house will be replaced, as well as the building's boilers.

DID YOU KNOW?

The gym in the River Bluff addition features bleachers with a seating capacity of up to 605 people. More than enough to accommodate the entire student body! Combined with an 11' by 18' projector screen mounted on the opposite wall; this setup make the gym an ideal space for school-wide assemblies!
