### Your Infant's Brain Development

Much of your baby's brain develops after birth. It also devel-  
ops more rapidly before age one than at any other time in  
life. Therefore, you have many chances every day to help  
your baby's brain  
develop in healthy ways.

- The outside world shapes the brain
- Babies learn to experience the outside world through  
their senses
- The experiences you provide greatly affect the way your  
young child will learn think, and behave for the rest of  
his or her life.

The brain is the part of the body that feels joy or despair,  
reacts in a loving or angry way, or uses reason instead of  
simply reacting. These abilities don't just appear. They are  
the result of heredity and the experiences the baby has  
during childhood.

Babies' brains are greatly influenced by:

- Their relationships with parents and other important  
caregivers
- There sense of sight, sound, smell, touch, and taste
- The feelings they experience, and
- The challenges they meet

Use babies' "quiet alert" time to help them grow and learn.  
Keep your baby near you. Babies thrive on loving attention.  
Smile when you talk.

Hold me, love me, praise me so,  
Teach me, hug me,  
watch me grow.

Ms. Lori Julian

Happy Spring! I love this time of the year. My name is Miss Lori  
And I am the teacher in room 11. I have been working in the field of  
Child Development for 11 years, 3 years with MVUSD. I currently  
Have a classroom full of spirited 3 to 5 year olds. I am always  
Looking for new ideas to engage children and spark their  
Imagination by attending workshops and conferences. I  
Hold a Child Development Teacher Permit and continue  
Perusing on my Bachelor Degree in human development.  
I have two children of my own, who are 3 and 5. We enjoy  
Testing out my new books and activities together.
