About Speech Time Fun and SLP Elevate

Speech Time Fun, Inc is the sole provider of SLP Elevate. SLP Elevate is a subscription-based service providing ready to use Speech Language Pathology resources which are tailored for older students.

The materials provided are unique to SLP Elevate. Materials are provided in digital and print ready formats.

- Monthly Print Themed Bundles
- Taxonomy Resources
- Graphic Organizers
- Caseload Trackers
- Digital Interest Finder Resources

All materials are created under the supervision and leadership of Hallie Sherman, M.S. CCC-SLP for the benefit of SLP Elevate subscribers. All content provided contains licensed clipart.

Data Privacy and Regulation

Exclusive Purposes for Data Use

Materials are provided in digital and print ready formats. Use of the materials provided do not require any entry of student information or any other form of Personally Identifiable Information (PII).

An optional online goal and data tracker is available as part of the membership. Educators may anonymize student information in place of their names as they see fit. Educators are empowered to utilize Multi-Factor Authentication (MFA) further enhancing the security of their login experience. The information is private to each Educator's Login and not visible to Speech Time Fun.

Data Accuracy/Correction Practices

Specific to the goal and data tracker, the Educator who entered the data is the only resource who can update and view the data. Should a need to change any data be required they may adjust as they see fit within the tool.

Subcontractor Oversight Details

All subcontractors of Speech Time Fun, Inc are bound by confidentiality policies and lack the ability to view, edit or change data within the platform.

Security Practices

All SLP Elevate digital resources are securely stored within the Kajabi Platform. Kajabi is a course and media hosting platform used by over 75M Customers and 110K business globally. All Data housed within Kajabi is encrypted in transit, at rest and further protected by role-based access with optional multi-factor authentication (MFA)
