

Welcome to Advanced Algebra Honors (formally known as Algebra 2 Honors)

We, your future teachers, desire for you to have a successful Algebra II experience. The Algebra II Honors curriculum is rigorous, beginning with advanced skills such as Statistical Reasoning. These topics will be approached with the assumption you have mastered the prerequisite skills learned in Algebra I and Geometry. To facilitate this, your first task is to complete a mandatory summer assignment. This assignment is intended to help you review the most essential Algebra I topics that will in turn allow you to succeed in Algebra II Honors. It is crucial for you to get a head start on your Algebra journey this summer so we can begin the school year with new topics.

Please sign up for the delta math class for the summer. Save your information so that you won't lose your login over the summer. Use your personal email address for the summer.
