## Interview with The Coyote Times Journalists

By: Will Tyler

If you could have any superpower, what would it be and how would you use it?

- Will: Mind reading because I can see what people are thinking
- JR: Super fast because I can be the fastest in 4th grade.
- Tessa: Talk to animals to tell them to stop crossing roads...except chipmunks
- Harry: To control people's minds because to make people agree with me
- Eli: Teleportation to go on vacation.
- Mrs. Kundrat: Mind reading so I can see what people are thinking.
- Mrs. Garren: Freeze time because you can get more done.
- Joy: The power to create dogs and I would give them to my friends and keep some too!
- Carrie: Turn into a cat for cuteness.
- Eveline: Speak to animals so I can know why my cat meows.
- Hannah: Teleportation to get to places faster.

## **Top Five Interesting Facts About Walt Disney**

**By: JR Salazar**

1. Mickey Mouse was created in 1928, and his talents were first used in a silent cartoon entitled Plane Crazy. However, before the cartoon could be released, sound burst upon the motion picture screen. Thus Mickey made his screen debut in Steamboat Willie, the world's first fully synchronized sound cartoon, which premiered at the Colony Theatre in New York on November 18, 1928.
2. On December 21 of that same year, Snow White and the Seven Dwarfs, the first full-length animated musical feature, premiered at the Carthay Circle Theatre in Los Angeles. Produced at the unheard of cost of \$1,499,000 during the depths of the Great Depression, the film is still accounted as one of the great feats and imperishable monuments of the motion picture industry. During the next five years, Walt completed such other full-length animated classics as Pinocchio, Fantasia, Dumbo and Bambi.

3. He had three brothers named Herbert, Roy, and Raymond and one sister named Ruth.
4. He had 2 kids named Diane and Shanor.
5. Walt Disney died of lung cancer in 1966.

## **Raccoons**

**By: Teresa Liguori**

Raccoons live in the United States, Canada, and parts of Central and South America. In the wild, raccoons typically live about five years, though the oldest wild raccoon was 16 years old. Babies are called kits. They weigh between 14 and 23 pounds. In 1926-192, President Calvin Coolidge kept a raccoon in the White House named Rebecca. Raccoons are nocturnal, but they are colorblind. A group of raccoons is called a gaze, and a group of mothers and their babies is called a nursery.

## **Star Craft**

**By: Joy Becker**

1. To begin, cut stars out of a cereal box.
2. Next, use gold spray paint to cover the printed side of the cereal box.
3. Then, grab some wire hangers and untwist all of the hangers.
4. Cut about a 30-inch piece of wire and then bend it into a circle with a hook.
5. You can add the beads to the wire, if you want.
6. Paint the stars with acrylics (using the brown side).
7. Use string to attach the stars to the wire.

### **3 Things To Do Inside On A Rainy Day**

**By: Tessa Ligouri**

1. Worm Farm - Wash and dry a small jar and tape black paper around it. Fill it almost to the top with damp soil in banana phloem\*. After it rains, look on sidewalks close to grass and in puddles. \*Phloem is the stringy stuff on bananas.

2. Make a puzzle - Draw a design of your choosing on a piece of paper. Glue two pieces of craft foam together, and glue the drawing on top of it. Let it dry. Last, cut the puzzle into shapes with lots of lines and edges.
3. Blindfolded Pictionary - With a partner, put a piece of paper between you. Drawer - close your eyes and draw a picture. Guesser - Try to guess what the Drawer is drawing before they're done drawing it.

### Katy Perry Goes to Space

By: Will Tyler and Addy Hunter

Katy Perry was one of the 6 passengers to go on the Blue's origin's All-Female flight to space. Other passengers were journalist Gayle King, NASA aerospace engineer Aisha Bowe (Aerospace engineers design, develop, test, and maintain aircraft, spacecraft, and satellites), and Lauren Sanchez. Jeff Bezos will lead the mission to space.

The Crew departed from West Texas On New Shepards Rocket. This trip was designed for Space tourism. The New Shepard also DOES NOT HAVE A PILOT! The ship takes off then once the shuttle is in space the top of the shuttle (where the crew is) separates from the bottom as the bottom flies itself back to earth with no pilot and lands PERFECTLY. Then the crew spends a few minutes in Zero Gravity. They can get out of their seats. Then they get back in their seats, enter earth's Atmosphere and a parachute is deployed and they land safely.

## **Pokemon Cheeto Sells for Almost \$90,000**

By: Will Tyler

A Flamin' Hot Cheeto resembling Charizard, the iconic, dragon-like Pokémon with wings, has sold for an astounding \$87,840. The Fire/Flying-type Pokémon look-alike, named "Cheetozard," was listed for \$250 by Goldin Auctions on February 10, 2025. After a bidding war that stretched into the early hours of March 2, 2025, it sold for \$72,000 plus \$15,840 in fees to an anonymous buyer. Cheetozard is now the most expensive food item ever sold by Goldin. Nobody knows who initially found Cheetozard. However, in 2019, Paul Bartlett, the owner of a collectibles shop in Georgia, saw it on eBay for \$500. After some negotiating, he bought the chip for \$350. Bartlett stored it in his safe and forgot about it until 2024. Believing Pokémon fans might like it, he posted a short video of the unusual chip on Instagram. His post quickly went viral. Realizing its value, Bartlett decided to sell it. He found a buyer on eBay willing to pay \$10,000. However, the deal fell through because he refused to mail it, and eBay did not allow in-person delivery. In November 2024, he sold it for the same amount to Arena Club, an online trading marketplace. Arena Club later sold it as part of a mystery card pack. The anonymous buyer then took Cheetozard to Goldin Auctions for a pop culture auction on February 10 — and the rest, as they say, is history.
