

asap! PRESENTS

THE CELEBRATION OF YOUNG PHOTOGRAPHERS

CALL FOR SUBMISSIONS

Transformation means change or renewal. We see transformation all around us. For example, a raspberry turns quickly to mold on a hot day, while a civilization transforms slowly as people invent and share ideas. Transformation also happens in our minds and bodies when we learn new things or talk with friends. It happens to a caterpillar that becomes a butterfly. How is transformation happening in your life today? How can you represent that change through a photograph?
