

BLUEPRINT for PROGRAM PARTNERS

ROLE OF A PARTNER

Thinking Bigger partners with businesses and organizations that provide monetary support to help deliver Thinking Bigger programs and to develop other partnership efforts. These businesses and organizations also provide their employee base to be volunteers in the classroom to deliver Thinking Bigger programming.

SCHEDULING

Once you choose to partner with Thinking Bigger, a program manager will connect you with a local school district and/or classroom teacher. You will also be provided an orientation and training session.

COMMITMENT

Your commitment could vary from a single school day or class period to a monthly visit of one hour each for 9 months. It all depends on your availability and coordination with the classroom teacher and partnering business. Scheduling is somewhat flexible.

POWER UP

Students love the hands-on learning opportunities that the Thinking Bigger program provides. The program partner is the critical component in the successful delivery of the program, and sharing their professional or personal experiences that align with Thinking Bigger content and concepts helps students see how they can achieve success in the renewable energy and engineering industries.
