

# Scope and Sequence

This scope and sequence is a recommended timeline and sequence designed in alignment with the curriculum map provided by the Georgia Department of Education (GaDOE) for reference when planning instructional content for the 180-days student calendar for Georgia schools. Note that specific dates have not been assigned to each unit to allow teachers flexibility and choice.

When making decisions about pacing and content, specific tips are included below for consideration:

- Teach the geography standards first to provide students with a solid foundational understanding of where places are located, and teach the historical standards in chronological order to help students better understand the past.
- Weave in and reinforce geography, government, and economic standards along with Map and Globe Skills and Information Processing Skills throughout each historical unit when appropriate.
- Consult standardized testing weights, domains, and dates to ensure that students have had the opportunity to successfully master content before testing; adjust number of days accordingly.
- Incorporate a one- to two-week block to review content before the testing date.
- Carefully consider individual student interests, strengths, and needs, and make adaptations when necessary.
