

In-kind services provided to the charter school for the 2024–2025 school year include: assignment of a Lead Teacher for Special Education; assignment of a designated Coordinator for oversight and support; and provision of related services by CCPS staff, including a speech-language therapist assigned to the elementary and high school campuses (the charter school retained its own personnel for the middle school). Additional related services provided include occupational therapy and physical therapy.

The charter school continues to have access to CCPS referral processes for supplemental services, including behavior specialist consultations, functional behavioral assessments (FBAs), assistive technology evaluations, and participation in multidisciplinary team meetings. Referrals for evaluations and initial evaluations are also supported through district psychological services, which provide consultation, evaluation, and eligibility meeting attendance in accordance with IDEA requirements.

There is not a predetermined calculation for these services. All services needed for students are provided by the district.
