
WEEKLY PROJECT UPDATE

Current Week

Did a walk through with Eric Hayden as part of the pre job start. We also came up with a shoring plan for the openings that are needed to be cut into the bearing wall for new doors. We also noted that there were existing cracks in the masonry wall where we will be cutting. Pictures have been taken and are attached.

Ordered a second dumpster

Met with Mark Larson on site as part of the job start safety orientation

Upcoming Week

We will get a laborer on site to begin taking apart some existing metal shelving
