Parent/Guardian-Friendly Summary

At Heritage High School, we believe it is essential to involve and inform parents/guardians about opportunities, events, and activities that benefit all students.

Parents/guardians and families are partners in the vital work of educating children.

We strive to foster a collaborative relationship between parents/guardians and school staff to increase our students' potential for success in school.

To facilitate this, we have developed a Parental Engagement Plan. This plan is intended to enable two-way communication with parents, provide parents/guardians with resources to help their student(s), outline ways stakeholders can volunteer and be involved on campus, and help parents/guardians understand how to collaborate with our school regarding decisions that may affect their family.

Heritage High School staff members take great pride in working with parents/guardians, students, and community members to improve the school and ensure the success of all involved.
