Highlights and Trends

1. Enrollment Projection Methodology:

The five-year enrollment projections are calculated via a geographically based cohort survival model, which projects future students by grade. The model is based on three-year historical enrollment as well as birth data to capture the effects of natural trends in student populations. Each school is then analyzed for checks of reasonableness and are adjusted as needed to reflect enrollment changes that are not picked up by the projection model. Some examples where corrections are required include:

- New residential construction
- New residential construction reaching build-out
- Attendance zone changes
- Charter or private school openings/closings
- International immigration trends
- Domestic migration trends
- Changes in economic conditions
- Natural disasters

In addition, projections may be adjusted to reflect annual changes in district programs and/or state mandated plans, these may include:

- Choice programs open to out-of-zone students
- Controlled Open Enrollment (COE)
- Placement of Exceptional Student Education (ESE) clusters
- Placement of PreK units
- Family Empowerment Scholarship
- Other state mandated scholarships
- Other reassignments/assignments

Due to the timeline of charter schools finding a location and building, the district does not know specifically, in some instances, which district schools will lose students to new charters until just prior to the opening of school. Charter schools are not required to provide district staff with a location as late as a month before opening. In addition, some charter schools which are scheduled to open may fail to do so.

2. Education Options:

Families have a multitude of education options in which to choose from, including more than 300 Choice and Career Program offerings in traditional District-operated schools. In addition, there are a number of State of Florida mandated programs/scholarships such as Controlled Open Enrollment and the Family Empowerment Scholarship. Students also have virtual options to choose from, to include the District-run Virtual Instructional Program and Palm Beach Virtual Franchise, and the State-operated Florida Virtual School (FLVS). Annual choice figures are factored into the five-year projections, though, unanticipated choice enrollment pattern shifts are a possibility throughout the five-year timeframe.

3. Projected Enrollment in Traditional District-Operated Schools:

K-12 enrollment in traditional District-operated schools is forecast to decrease by 709 students during the next five-years. Enrollment in the 111 District elementary schools is predicted to increase by 469 students, enrollment in the 33 District middle schools is projected to decrease by 1,182 students, and enrollment in the 24 District high schools is forecast to grow by 4 students. For the 2025-26 school year, the District will open Saddle View Elementary as a PreK-5 school.

4. Projected Enrollment for All School Types:

Total K-12 enrollment for all school types is projected to decrease by 731 students, or about a four tenths of a percent decrease over the five-year period. The largest enrollment increase is forecast at the elementary level. Projected total K-12 grade enrollment by SY2029-30 is 186,831 students; this compares to 187,562 students in SY2024-25, the current school year. Projected SY2029-30 enrollment for PreK-12 grade is 191,094 students, a 476-student decrease from the SY2024-25 enrollment of 191,570 students.

5. Charter School Enrollment:

Charter school enrollment decreased for a second straight year by nearly 250 students for SY2024-25. Decreases in charter school enrollment were experienced at the elementary and middle school levels, decreasing by 233 and 150 students respectively. Enrollment at charter high schools increased by 134 students. By SY2029-30, K-12 charter school enrollment is predicted to slightly grow by 10 students, decreasing by 56 students at elementary, 144 students at middle, and increasing by 210 students at the high school level. Total K-12 charter enrollment for FY2030 is estimated at 21,883 students or about 12% of total projected K-12 enrollment.

6. Births:

The historical number of births in Palm Beach County are collected from the Florida Department of Health's Bureau of Vital Statistics. The birth data is then disaggregated into individual elementary school attendance zones utilizing Geographic Information Systems (GIS) and then analyzed to project future kindergarten enrollment by school. Following lower recessionary-based birth rates from 2009 to 2011, Palm Beach County experienced increases in birth rates from 2012 through 2018. During this 2012-2018 period, the largest annual increase in births was evidenced from 2014 to 2015 (+440 births). The first birth rate decline since the recessionary years occurred from 2018 to 2019, with the County experiencing a decrease of 327 births. The birth rate decline continued into 2020, with 625 fewer births in Palm Beach County as compared to 2019. From 2020 to 2021, births increased by +377, with a continued increasing trend from 2021 to 2022 (+1,024 births). From 2022 to 2023 births declined by 441. At the time of this publication, 2024 births were not yet available.

7. Residential Construction:

There a number of approved or planned residential developments across Palm Beach County with some projects currently ahead of previously forecasted scheduling estimates. The five largest approved or planned developments are:

- Westlake (City of Westlake) – 4,223 non-age restricted units (under construction)
- Indian Trails Grove (Unincorporated PBC) – 3,897 units (construction has not yet commenced)
- Avenir (City of Palm Beach Gardens) – 2,940 non-age restricted units (under construction)
- Arden (Unincorporated PBC) – 2,334 units (under construction)
- Alton (City of Palm Beach Gardens) – 2,052 units (under construction)
