

MEMORANDUM

July 13, 2011

TO: Board Members

FROM: Terry B. Grier, Ed.D.
Superintendent of Schools

CONTACT: Carla Stevens, (713) 556-6700

SUBJECT: **2011 END OF COURSE RESULTS**

The spring 2011 End of Course results have arrived. In 2007 Senate Bill 1031 was enacted, which called for the development of “end-of-course assessment instruments for secondary-level courses in Algebra I, Algebra II, geometry, biology, chemistry, physics, English I, English II, English III, world geography, world history and United States history.” The purpose of the end-of-course (EOC) assessments is to measure students’ academic performance in core high school courses and to become part of the graduation requirements beginning with the freshman class of 2011–2012. In addition, a student’s score on each EOC assessment will be worth 15% of the student’s final grade for that course.

Current results only include those for operational EOC assessments and are limited to raw score distribution summaries, raw score distribution by reporting category summaries, and raw score frequency distributions for Algebra I, geometry, Algebra II, English I – reading and writing, biology, chemistry, physics, world geography, and U.S. history. In 2010, Algebra I was the only EOC for which standards have been set, but there were no standards applied to the 2011 data, so only the raw score metrics are available this year for Algebra I. Comparisons cannot be made between 2010 and 2011 data because the number of reporting categories (formerly called objectives) and items measured changed from 2010 to 2011 on a number of the exams.

Table 1 shows the number of HISD students tested, the average raw scores, and the average percent correct for each subject tested by student demographic groups.

It should be noted that there was a district directive for all students in an EOC-assessed course to take the assessment in 2010 with few exceptions. In 2011, students who were taking Advanced Placement exams, Laying the Foundation EOC exams, and students in certain instructional settings were excluded from STAAR EOC testing. This decreased the number of students tested in certain subjects and makes performance results not comparable.

Table 2 shows the average raw score and average percent correct for all students for the district and state for the spring 2011 EOC assessments.

Table 2: District and State Number Tested, Average Raw Score and Average Percent Correct by Subject: 2011 EOC Assessments

Subject	HISD			State
