Introduction

Why Chemical Health

St. Cloud Area School District 742 provides chemical health counseling at North and South Junior Highs, Apollo and Tech High Schools, and McKinley-ALC. Services can be provided at other sites within our district upon request.

Our chemical health counselors provide a welcoming and non-judgmental space for students who may be currently experiencing:

- ✓ Substance misuse
- ✓ History of substance misuse
- ✓ Impact by someone else's misuse

Upon the initial meeting, the student and counselor will develop a plan based on student needs.

Recovery School

Located at McKinley-ALC, Recovery School offers a supportive classroom setting for youth in recovery to continue their education.

For more information, please contact:

Program Coordinator:

Jenna Fuchs

Service & Provide

What We Do

Chemical health counselors can provide education, prevention materials, and intervention to students struggling with substance use or those who have been affected by substance use in a non-judgmental environment.

- ✓ Provide community resources
- ✓ Allow students a space to express concerns
- ✓ Provide support to District 742 students
