

Addendum #1

CPR, First Aid & AED Training & Credentialing

Issue Date: Monday, September 26, 2022

Bids Due: Thursday, October 6, 2022 at 1:00PM

1. Under the scope of work Section II, it states: (The course provided to students should mirror American Red Cross coursework in providing instruction in CPR, First Aid, and AED and the opportunity for students to earn credentials in all three areas). Would the American Safety and Health Institute (ASHI) be an acceptable form of certification provided to the students?

Yes- that is an acceptable form of certification for our students.

2. All four of the certifying bodies for FA/CPR/AED classes have a relative maximum of 12ish students per instructor per class. Is your expectation for us to provide 2 instructors each class since the RFP wants a price for 20 students per class?

Yes, we would want at least two instructors for each class.

3. Is the number of students 321 or 470 just to be clear? We saw both of those numbers and want to make sure we have the correct numbers.

321 students total.

4. Do you want the CPR training to include adult and infant CPR or just adult?

Just Adult.

5. Do you want BLS CPR? (Basic Life Support) or Basic CPR. We work with CTE programs that do both.

Basic CPR
