

Addendum #1

RFP for Network Cabling – Three Year Contract (FY23-FY25)

Issue Date: Friday, February 11, 2022

Bids Due: Wednesday, March 2, 2022

1. Do you know approximately how long the average cable run will be?

We don't know. It varies at each building site.

2. If a patch cord is needed would the school supply that or would we supply it?

A patch cord will be supplied by the district.

3. If there is no space on the patch panel to terminate, how would that be handled?

A new patch panel would need to be installed.

4. Will this price only be used for an average run? For example, a typical run to a classroom with nothing obstructing it.

Yes.

5. Would cable runs needed in the gym, and other areas with higher ceilings be quoted separately?

Yes.

6. When additional material is needed beyond the faceplate, cable, and jack such as molding, can that be billed separately?

Yes.
