

Addendum #1

Removal of Safe at 797 Westminister Street

Issue Date: Monday, March 14, 2022

Bids Due: Wednesday, March 23, 2022 at 1:00PM

1. Is use of the elevator permitted?

Yes, use of the elevator is permitted.

2. What is the capacity of the elevator?

The capacity of the elevator is 2,500 pounds.

3. Is this prevailing wage work?

Yes.

4. Are there any tools that cannot be used in this work?

There may be tools that we do not want to be used; we will consider this as part of the bid review and evaluation process. Please provide in your plan the tools you plan to include in your price. We anticipate that there will be some noise, banging, grinding and vibration which is why all work needs to be done between Friday night and the weekend.

Contractor is responsible for removing debris created as a result of this work.

5. Does the work have to be done over the weekend?

Yes. Work could begin on a Friday afternoon at/after 5:00PM and must be complete with the worksite returned to its previous state by EOD Sunday.

6. If the front door of 797 Westminster is used for removal, would a police detail be required to close pedestrian access to the sidewalks and/or to use the parking lanes in front of the building?

If the awarded vendor's removal plan involves the use of the front door to 797 Westminster Street, PPSD will work with the awarded vendor and the city to ensure that all requirements are met related to notification to Public Works and any permitting from Public Works and/or Providence Police Department.

The RFP indicates: "Contractor will provide requirements for any cubicles or obstacles that need to be identified for PPSD or the contractor to remove/relocate to make space for removing the safe and its parts." Bidders are encouraged to present an alternate pricing proposal in which the Contractor would remove any cubicles or obstacles in order to make space for removing the safe and its parts. The district will evaluate both pricing proposals.
