

We will be using ParentSquare to communicate with families about our season. We will share the schedule, announce any changes, request sign ups for events, and communicate other important information through this district-sponsored platform. Your account has already been created using the email and phone number provided to your child's school and will be notified in both forms. However, we do recommend downloading the ParentSquare App for a more enhanced user experience. (ParentSquare App instructions attached.) If you find that you are not receiving communications please contact your school to verify accurate contact information.

ParentSquare also has a StudentSquare interface. We would love to keep students in this communication loop. For your student to receive communications they would need to activate their student account via their school email address and download the StudentSquare application on their personal device. No student phone numbers are used and students will not be able to communicate with other students or parents. Students can only communicate with post authors (coach/teachers) that send communications to them. Students will receive post notifications via email and the application once downloaded to their device for use outside of the school day.

Please select your preference below with regard to your student accessing StudentSquare and give it to the coach/advisor.
