

June 2024 Construction Update – Sutherland High School

Tennis Court Upgrades Underway

Construction work is on track with work underway on the Sutherland High School tennis courts. The base and drainage for the courts are being set, and construction will continue through the summer. As an outdoor athletic area, the construction will be affected by weather conditions and could continue into the fall. While work is underway, tennis sports and activities will all occur at Mendon High School.

Pittsford Village Waterline Project

The Pittsford Village is working on a waterline installation, related to the Westport Crossing residential project, in front of the Sutherland High School campus and on Sutherland Street. As a result, most of the sidewalk on Sutherland Street is closed off as crews work to lay the new water line.
