

2025 – 2035 Demographic Report for Matawan Aberdeen Regional School District

PRESENTED BY FRED HEJAZI

Introduction – Citygate

• Citygate

- 38-year-old company
- Consulting firm specializing in redistricting & school planning
 - Redistricting software (Desktop and Internet)
 - Enrollment Projection
 - Bus Routing (Desktop and Internet)
- 28 years of continuous demographic/redistricting experience
 - × K12, School Boards, Council, Water, Legislative, Congressional ...

• Fred Hejazi

- 27 years hands on demographic experience
- Multiple school projects
- Extensive mapping and analysis experience

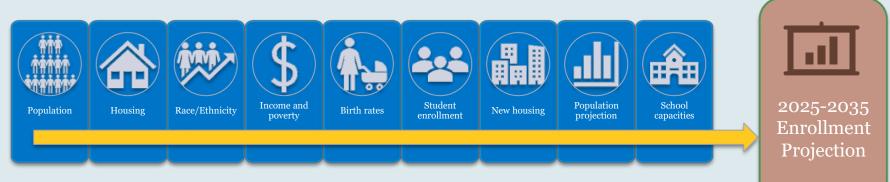

- Review relevant demographics nationally, regionally and locally
- Analyze data from US Census, State of NJ, Monmouth County, Borough of Matawan, Township of Aberdeen and & MARSD
- Determine changes affecting student enrollment
 - In total population
 - In housing
 - Race and Hispanic origin
 - Income and poverty
 - Birth rates

Methodology

- Determine past trends in student enrollment (cohort survival)
- Identify factors affecting future enrollment such as
 - Proposed new housing construction
 - Population projection
 - School capacities
- Create enrollment projection
- Determine impact to each school (Capacity analysis)

MARSD Where Students Reside

PreK - 3 Students currently at Cliffwood, Ravine Drive and Strathmore Elementary Schools

MARSD Where Students Reside

Grade 4,5 Students currently at Lloyd Road Elementary School

Grade 6-8 Students currently at Matawan Aberdeen Middle School

Grade 9-12 Students currently at Matawan Regional High School

Conclusions

- 1. MARSD's population growth over the 2010 -2020 decade was on par with national levels and larger than the local and regional trends.
- 2. The changes in demographics indicate growth primarily through migration
- 3. Median income has steadily grown since 2016. (\$86,000 \$123,389 per household)
- 4. Number of births grew 2020-2022 (the last year for which data is available).
- 5. MARSD population is expected to grow by 4.2% between 2020-2030 after which it will slow to 0.1%.
- 6. Cohort survival rates are between 95% and 102% from KG-12.
- 7. Birth to Pre-K is in flux. From 2009 to 2018 ranged from 92 to 110. 2008 to 2024 the range is 110-442
- 8. To project enrollment Birth Pre-K was used for Pre-K and Birth to KG was used for KG. Birth to KG has been consistent.
- 9. Mid level projected enrollment for 2034 is 4422 or 12% for the next decade
- 10. Capacity issues will be primarily at the elementary school level.

Conclusions

- 11. Pre-K to 3 capacity issues can be addressed by adjusting class sizes and/or boundaries.
- 4th and 5th grades currently at Lloyd Rd. Elementary. By 2032 it is expected to be 42 students over capacity. Increasing class sizes for 5th graders could address the capacity issue. Alternatively, grade reconfiguration could be considered.
- 13. By 2034 the enrollment at Lloyd Rd. Elementary is expected to be 14 students over capacity.
- 14. The Pre-K to Kindergarten enrollment has been in flux. If a pattern emerges over next 2 years, it is likely that it will continue across other grades as K-12 rates have been consistent.
