The Net Promoter Score is used across industries and organizations as a measure of customer loyalty. Using a Likert scale 0-10, the item invites individuals to rate their "willingness to recommend" the organization or unit within the organization.

The Net Promoter Score measures a loyalty relationship between an organization and its stakeholders and should not be considered a "target" score, but, rather, a baseline which should be viewed over time as a measure of improvement. The NPS is best used as an organizational measure and is not appropriate for internal entities like a school, department, or division. A NPS calculated with fewer than 100 participants should be viewed with caution as the most accurate results will be generated with 100+ participants. The importance of the NPS item is for benchmark comparison in a way that is standard across business, industry, and organizations.

The NPS rating can range from -100 (lowest, everyone is a Detractor) to +100 (highest, everyone is a Promoter). The NPS rating is calculated by subtracting the percentage of Detractors from the percentage of Promoters.

The NPS for students recommending their school as a good place to learn is **-11.64**.

The percentage of Promoters (participants selecting 9-10) is 25.79%.

The percentage of Passives (participants selecting 7-8) is 36.78%.

The percentage of Detractors (participants selecting 0-6) is 37.43%.

Net Promoter Score Interpretation

0	1	2	3	4	5	6	7	8	9	10
Detractors							Passives	Promoters		
Unhappy, dissatisfied							"On the fence"	Engaged, enthusiastic		

-100 to 0 = More detractors than promoters, opportunity for improvement

0 to 30 = Good performance, opportunity for improvement

30 to 50 = Strong performance, sustain or grow

50-100 = Excellent performance, sustain
