

Spanish Dual Language Immersion Program

Benefits of a Dual Immersion Program:

- Bilingual Proficiency in Both Languages
- Enhanced Cognitive Skills
- Cultural Awareness and Appreciation

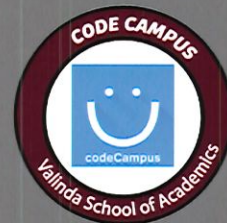

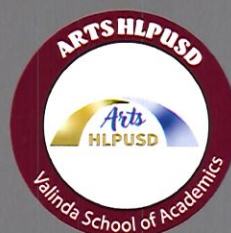

Beneficios de un Programa de Inmersión Dual:

- Dominio de ambos idiomas
- Habilidades cognitivas mejoradas
- Conciencia y apreciación cultural

A Community School

Valinda is a community school offering tailored services and support to meet the unique needs of each neighborhood. It is created and run by those who know our children best, working together to support their success. While teachers teach and students learn, the focus extends beyond academics, emphasizing a holistic approach that nurtures the whole child.

Visual and Performing Arts Program

Music, dance, choir and art are essential for students' development, fostering creativity, confidence, and collaboration. These disciplines enhance critical thinking, communication, and emotional expression, while also boosting academic performance and well-being. By engaging in the arts, students grow into well-rounded, innovative thinkers prepared for success in any field.

Technology

Code Campus teaches students coding skills through Scratch, Minecraft and Python. These coding skills transfer over to our FIRST® LEGO® League robotics program, which introduces kids ages 7 to 10 (grades 2nd-5th), to the fun and excitement of science and technology, while building self-confidence, knowledge, and valuable career and life skills. The program challenges students to think like scientists and engineers. Teams solve real-world problems and learn engineering concepts, presentation techniques, and programming.
