
LIBRARY INFORMATION AND TECHNOLOGY PROGRAMS: 2021

Library/media centers will be used to support and extend the classroom program of instruction and student mastery of state standards in all subject areas. Each center shall be provided with a collection of print and non-print materials, instructional equipment and other learning resource materials to meet the unique needs of the students and positively impact student learning. Print and non-print materials, educational technology and supplies, and other instructional aids will be catalogued in a manner that will enable such materials, equipment, and supplies to be accessible to students and teachers throughout the school year. Each center will be staffed to assist teachers and students in the integration of the collection aligned to proper technology/resource use and digital citizenship. Library staff will assist students and teachers in securing materials from other sources and promote college and career readiness.

The Superintendent/designee shall establish procedures for the selection of materials. Parents/guardians who wish to express concern about specific material included in the collection may do so according to the procedures outlined in Administrative Procedure 2018P.
