6th Grade Design Lab.

Sixth-grade students participated in the Design LAB: Learn And Build education program, exploring this year's theme, *PUSH PLAY — BUILDING FOR FUN*. They collaborated by using architectural and engineering concepts, followed a structured Design Process, and designed non-traditional play spaces for diverse clients. Students collaborated with visiting engineers and architects, ultimately creating scale models and tri-fold displays to showcase their work. We're proud of their creativity and effort on this exciting project!
