

C-26007 Migration from Mitel MiVoice Connect to Mitel MiVoice Business Support and Maintenance

The District's current phone system is being phased out by the manufacturer and will no longer be eligible for maintenance and security updates, along with other hardware and software expansions. Consequently, it is necessary to migrate to a new phone system. By migrating to Mitel MiVoice Business, the District can more easily move the existing configuration over and continue to use telephones that are compatible with both the existing and new systems, making for a more seamless transition.

Three proposals were received that included the cost to migrate, support options, training and unit pricing for hardware. After evaluating, it was determined that the 3-year support option from Towner Communications is the most advantageous bid for the District.

VENDOR	TOTAL COST
TOWNER COMMUNICATIONS - Kansas City, MO	\$788,263.90
Award to TOWNER COMMUNICATIONS , Kansas City, MO
