SPPS Statement of Intent

Rationale: This proposal is in response to U2.1 and U2.2.

Commitment to Clarity and Collaboration Regarding Access by External Agencies

The Board of Education, Independent School District No. 625, affirms the importance of clear policies that protect and support students and staff while ensuring compliance with state and federal immigration law. These policies outline how the district will inform employees of legal obligations, institutional practices, and the rights and protections afforded to students and staff.

The Board recognizes a need for continued collaboration and as part of this effort, staff, including representatives selected by the Saint Paul Federation of Educators, will be invited to participate in a working session to shape policy recommendations and ensure they reflect both legal clarity and community values.
