

Dear Parent/Guardian:

Pleasanton Unified School District principals and teachers may use various digital applications in their classrooms as a way to engage students in a more tech-friendly and quickly evolving educational environment. The majority of modern curriculum involves a large online element along with physical resources. Projects may be shared privately with other classes over the Internet and with parents, and also may be shared publicly on the Internet to collaborate across districts.

PUSD realizes that the importance of teachers, students and parents engaging, collaborating, learning, and sharing in these digital environments is a part of 21st century learning. PUSD takes the protection of students' personal information very seriously when participating in online activities, to keep in compliance with the student Digital Privacy Agreement's (DPA's) to ensure student digital privacy.

Please return the lower portion of this form **only if you do NOT want your child to participate** in any teacher-moderated, online applications in the classroom. These online applications do not include Google Apps for Education, as these are being used District-wide. Google Apps for Education include the student Gmail account and Google docs (sheets, forms, slides and sites).
