

How to clear the cache on an iPad

1. Open Settings and scroll down to the fifth group of options.

The first option in this group is Passwords & Accounts – scroll down a little further until you see “Safari” and tap Safari.

2. Scroll down and tap “Clear History and Website Data.”
3. In the popup, tap “Clear History and Data” to confirm.

Note that this will log you out of any websites you've currently signed into.
