

North Arlington School District Summer Assignments Incoming Grades 1-5

Purpose: These activities are designed to help students maintain and strengthen the skills they learned during the school year. They encourage continued reading, writing, and math practice to prevent learning loss over the summer break. They also promote curiosity, responsibility, and a smooth transition into the next grade level.

Expectations: Students are highly encouraged to engage with these activities, but they are not required. Incentives will be provided to students who demonstrate significant progress in their summer learning.
