Date: June 16, 2025

Currently the infrastructure assessment phase of the facility master plan is complete in draft form for review. A draft of playground assessments are also available for review and are 95% complete. Physical Plant is currently working with a third party consultant to finalize the greenhouse gas inventory and expect to have a draft report later this summer. The last phase of the master plan is athletics. Our civil engineering team is currently working on that phase with an expected draft report coming towards the end of July. All phases will then be compiled into one master report which Physical Plant will roll into an updated internal ten (10) year capital plan.
