¹ Because AIG headcount data is reported annually on April 30, all other data used is effective April 30 of each academic year (or, if not available for that date, as near as possible).

² AIG headcount percentages are compared to the WCS population in grades 3-12 because AIG identification begins in grade 3.

³ Positive numbers in this column indicate areas in which AIG headcount representation is higher than the percentage of the same demographic in the WCS grades 3-12 population. Negative numbers here indicate the opposite (i.e. AIG headcount representation is lower than in WCS grades 3-12).

⁴ Data is suppressed to protect personally identifiable information (i.e. the subgroup was less than 5%)
