TORO PARENT NEWSLETTER

Unit 3 MATH

Dear Parents: Please check your child's Google Classroom and Aeries Grades regularly to make sure that your child is keeping up with their assignments. Encourage your child to attend intervention if they are falling behind to catch up. **Unit 1 Benchmark (includes unit 1-3) the week of November 4-8, 2024.**

7th Grade Learning Objectives

I will be able to...

- compute unit rates associated with ratios of fractions
- use unit rates to solve real world problems.
- decide whether two quantities are in a proportional relationship
- defining what constitutes a proportion when looking at a graph, table
- identify the constant of proportionality from a graph, table, and equation.
- represent proportional relationships by equations.

8th Grade Learning Objectives

I will be able to...

- use scientific notation to estimate very large or very small numbers
- express how many times as much one is than the other using scientific notation
- add, subtract, multiply and divide numbers in scientific notation

7TH GRADE VOCABULARY

1. Ratio
2. Rate
3. Unit Rate
4. Equivalent Ratios
5. Proportional relationship
6. Ordered pair
7. Coordinates
8. Constant of proportionality
9. Inverse operation
10. Equation
11. Isolate

8TH GRADE VOCABULARY

1. Scientific notation
2. Power of ten
3. Product
4. Standard form
5. Expanded form
6. Exponent
7. Coefficient

Students can go on Clever to practice their individual learning path for math

My Path Math for Geometry and Measurement, number sense and data analysis.
