

Attention Parents: It's Meningococcal Booster Shot Time!

Is your child starting the 11th grade?
There's a NEW Georgia school entry requirement!

Starting July 1, 2021, students entering or transferring into the 11th grade must submit proof of a Meningococcal Conjugate Vaccine (MCV4) booster shot, unless their 1st dose was received on or after their 16th birthday.

Getting an MCV4 booster shot will help keep your teen healthy and safe from meningococcal disease. Check with your doctor or local public health department to find out if your teen is up to date on their MCV4 booster shot and other shots recommended for teens.

For more information, call **(404) 294-3700**.
