RE: PFMS Update
Date: June 16, 2025

On June 2, 2025 Administration hosted a community forum regarding the construction of the new Park Forest Middle School. A [presentation](#) was provided followed by a question and answer session. Q&A topics included interior daylighting, tennis court design, and general school siting.

In the time since the forum, Administration has been working with the engineering team on finalizing the traffic study in hopes that a traffic light will be warranted at Amblewood Drive and/or Little Lion Drive. In addition, with the guidance of SCASD's resource officers, Administration has made the decision to remove all interior classroom windows for security purposes.
