

Restrictive Procedures Plan
Alexandria Public Schools District #206
July 2025

Minnesota laws encourage the use of positive behavioral supports and strategies and seek to reduce the use of physical holding and seclusion (restrictive procedures). Schools may only use restrictive procedures in response to an emergency situation where immediate intervention is needed to protect a child or other individual from physical injury. Emergency does not mean circumstances such as a child who does not respond to a task or request and instead places his or her head on a desk or hides under a desk or table or a child who does not respond to a staff person's request unless failing to respond would result in physical injury to the child or other individual; or an emergency incident has already occurred and no threat of physical injury currently exists. Restrictive procedures will not be used to punish or otherwise discipline a child.

Alexandria Public Schools intends to use:

The restrictive procedure that Alexandria Public Schools may use in an emergency situation is **physical holding**.

Physical holding- physical intervention intended to hold a child immobile or limit a child's movement, where body contact is the only source of physical restraint, and where immobilization is used to effectively gain control of a child in order to protect a child or other individual from physical injury.

- Specific physical holds that staff are trained to use: Nonviolent Crisis Intervention with Advanced Physical Skills (CPI)

Additional information about the use of physical holds:

- The term physical holding does not mean physical contact that:
 - a) Helps a child respond or complete a task;
 - b) Assists a child without restricting the child's movement;
 - c) Is needed to administer an authorized health-related service or procedure; or
 - d) Is needed to physically escort a child when the child does not resist or the child's resistance is minimal.
- A physical hold may be used only in response to behavior that constitutes an emergency, even if written into a child's IEP, IFSP, or BIP.
- An improper physical hold, a physical hold used by an unauthorized or untrained staff person and any reasonable force which intends to hold a child immobile or limit a child's movement where body contact is the only source of physical restraint will be reported as a physical hold.
- Each time a physical holding is used, the staff person who implements or oversees the physical holding documents, as soon as possible after the incident concludes the following information:
 - a) a description of the incident that led to the physical holding
 - b) why a less restrictive measure failed or was determined by staff to be inappropriate or impractical;
 - c) the time the physical holding began and the time the child was released;
 - d) a brief record of the child's behavioral and physical status; and

- e) a brief description of the post-use debriefing that occurred as a result of the use of the physical hold
- The school will make reasonable efforts to notify the parents on the same day a restrictive procedure is used on the child, or if the school is unable to provide same-day notice, notice will be sent within two days by written or electronic means or as otherwise indicated in the Student's IEP.

Restrictive Procedures Not Used in Alexandria Public Schools

The Alexandria Public Schools does not use the restrictive procedures of **prone restraint** or **seclusion**.

Prone restraint- placing a child in a face down position.

Seclusion- confining a child alone in a room from which egress is barred. Egress is barred when an adult locks or closes a door, leaving a child in the room alone and preventing the child from leaving the room. Removing a child from an activity to a location where the child cannot participate in or observe the activity is not seclusion.

Prohibitions

District staff are prohibited from using the following actions or procedures:

1. engaging in corporal punishment which is defined by Minnesota statute to be conduct involving: (1) hitting or spanking a person with or without an object; or (2) unreasonable physical force that causes bodily harm or substantial emotional harm. [Policy 507](#)
2. requiring a child to assume and maintain a specified physical position, activity, or posture that induces physical pain;
3. total or partial restriction of a child's senses as a punishment;
4. presenting an intense sound, light or other sensory stimuli using smell, taste, substance or spray as punishment;
5. denying or restricting a child's access to equipment and devices such as walkers, wheelchairs, hearing aids, and communication boards that facilitate the student's functioning, except when the temporary removal of the equipment or device is needed to prevent injury to the student or others or serious damage to the equipment or device, in which case the equipment or device shall be returned to the student as soon as possible;
6. interacting with a student in a manner that constitutes sexual abuse, neglect, or physical abuse as those terms are defined in chapter 260E;
7. withholding regularly scheduled meals or water;
8. denying access to bathroom facilities;
9. physical holding that restricts or impairs a child's ability to breathe, restricts or impairs a child's ability to communicate distress, places pressure or weight on a child's head, throat, neck, chest, lungs, sternum, diaphragm, back, or abdomen, or results in straddling a child's torso;
10. prone restraint
11. the use of seclusion on children from birth through grade 3 by September 1, 2024.

Implementation of a Range of Positive Behavior Strategies

Positive behavioral interventions and supports are interventions and strategies to improve school environments by teaching children the skills to prevent problem behavior, providing instruction and support for positive and prosocial behaviors, and supporting social, emotional, and behavioral needs for all students. Staff will

implement a range of positive behavior strategies as a proactive approach to addressing student needs and teaching positive behavior skills by:

1. establishing, defining, teaching and practicing three to five positively stated school wide behavioral expectations that are representative of the local community and cultures Code of Conduct: [Policy 504](#);
2. developing and implementing a consistent system used by all staff to provide positive feedback and acknowledgement for students who display school wide behavioral expectations: Code of Conduct [rubric](#) at Elementary and the Cardinal Way [rubric](#) at the Secondary levels, [Core Skills](#);
3. developing and implementing a consistent and specialized support system for students who do not display behaviors representative of schoolwide positive expectations: MTSS interventions [flow chart](#), Check in/Check out and [Cardinal Red Program](#);
4. developing a system to support decisions based on data related to student progress, effective implementation of behavioral practices, and screening for students requiring additional behavior supports;
5. using a continuum of evidence-based interventions that is integrated and aligned to support academic and behavioral success for all students [Elementary Code of Conduct Resources](#); and
6. using a team-based approach to support effective implementation, monitor progress, and evaluate outcomes: SIT meetings, [attendees](#).

Mental Health Resources

To obtain mental health services or a referral to a mental health service provider, families should contact their primary care clinic, physician or insurance provider. Below is a list of additional mental health resources.

- [Children’s Mental Health Division of the Minnesota Department of Human Services \(DHS\)](#): administers policy and practice to ensure effective and accessible mental health services and supports for children and families in Minnesota. The division works together with many public and private partners across the state so that children and youth with mental health needs can develop and function as fully as possible in all areas of their lives. DHS is committed to making sure the right services are available at the right time for children with mental health needs and their families.
- Children’s Mental Health Crisis Response Services (CRS)
 - Crisis Text Line offers free help for those who are having a mental health crisis or are contemplating suicide. Services are available 24/7 across Minnesota. Text “MN” to 741741.
 - Call **CRISIS** (**274747) from a cell phone to talk to a team of professionals who can help you.

NAMI Minnesota provides support by helping people connect with needed resources and information. An extensive list of resources was gathered to make it easier for people to locate possible sources of help as they navigate through various systems that interface with mental health. You can find that list on the [NAMI Information and Resources web page](#).

Staff Training on De-Escalation

The school ensures that staff are trained to identify and appropriately address the needs of all students. Staff who may respond to emergencies are specifically trained in the following skills and knowledge areas:

1. positive behavioral interventions;
2. communicative intent of behaviors;
3. relationship building;

4. alternatives to restrictive procedures, including techniques to identify events and environmental factors that may escalate behavior;
5. de-escalation methods;
6. standards for using restrictive procedures only in an emergency;
7. obtaining emergency medical assistance;
8. the physiological and psychological impact of physical holding being used;
9. monitoring and responding to a child's physical signs of distress when physical holding is being used;
10. recognizing the symptoms of and interventions that may cause positional asphyxia when physical holding is used;
11. district policies and procedures for timely reporting and documenting each incident involving use of restricted procedure;
12. schoolwide programs on positive behavior strategies.

The school maintains documentation of staff training by the use of the Frontline System.

Monitoring the Use of Restrictive Procedures:

The school monitor and review the use of restrictive procedures by:

- Conducting post-use debriefings following the use of a restrictive procedure. These debriefing sessions will be recorded in Sped Forms, the District's due process paperwork management system.
- Convening an oversight committee to review the use of restrictive procedures three times per year. The oversight committee will identify and address patterns of problems indicated by:
 - similarities in the time of day, day of week, durations of the use of a procedure, the individuals involved. or other factors associated with the use of restrictive procedures;
 - the number of times a restrictive procedures is used schoolwide and for individual children;
 - the number and types of injured, if any, resulting from the use of restrictive procedures;
 - whether restrictive procedures are used in non emergency situations;
 - the need for additional training;
 - Proposed actions to minimize the use of restrictive procedures;
 - any disproportionate use of restrictive procedures based on race, gender, or disability status;
 - the role of the school resource officer or police in emergencies and the use of restrictive procedures; and
 - documentation to determine if the standards for using restrictive procedures as described in Minnesota Statutes 125A.0941 and 125A.0942 have been met.
- The oversight committee includes the below members, which are updated annually:
 - Vicky Doetkott, District Social Worker;
 - Jill Bantau, Secondary BCBA;
 - Amy Weisser, Elementary BCBA;
 - Linda Walters, Special Education Teacher
 - Sara Richards, Assistant Director of Student Support Services;
 - Michelle Bethke-Kaliher, Director of Student Support Services;
 - Heather Timm, Woodland Elementary Principal;
 - Sarah Kusters, Discovery Middle School Principal
 - Kari Tomoson, Special Education Teacher
