RSU 22 COVID-19 Health and Safety Protocols
2023-2024

COVID Positive Protocols

COVID 19 has changed over the last 4 years and our response to the illness will move to that of typical respiratory illnesses. Individuals can return to school if their symptoms have improved and they have been fever free without fever reducing medications for 24 hours. Students and staff are **encouraged to remain home when ill.** If you have questions about whether or not you or your student should remain home, please contact their school. US CDC Guidelines

Illness Prevention

- Staying up to date with vaccination to protect people against serious illness, hospitalization, and death. This includes flu, COVID 19, and RSV (if eligible)
- Practice good hygiene by covering coughs and sneezes, washing or sanitizing hands often, and cleaning frequently touched surfaces.
- Taking steps for cleaner air, such as bringing in more fresh outside air, purifying indoor air, or gathering outdoors.

Masking

Not required after a diagnosis of COVID 19.

If you have questions regarding testing or the management of respiratory illnesses please reach out to your building's school nurse.
