Security Policies Executive Summary

Vision and Philosophy

Edgenuity places a high priority on protecting the critical information we maintain in our information systems. Information security policies define a concise set of behaviors that provide a secure and enabling environment in which Edgenuity may use and manage its information resources with protection from data loss, service disruption, misuse or unauthorized access.

Information Security Directive

Edgenuity is committed to developing, adopting, and maintaining appropriate policies and procedures to ensure integration of information systems policies in line with Edgenuity's corporate mission, overall business strategy, risk posture and in accordance with regulatory guidelines. This will be accomplished by management oversight, effectively managing and monitoring information security risks, delineating clear accountability, and setting appropriate review processes to ensure that information security risks are continuously addressed.

Security Environment

Edgenuity utilizes proprietary data to deliver products and services to our clients. We also collect, process and store sensitive information that enables us to maintain competitive advantage and perform our mission. Accordingly, all customer information to include student and educator data as well as other sensitive company information will be protected by all staff, contractors, partners, and service providers in accordance with clearly defined policies and procedures.

The Management and Staff of Edgenuity will operate on the security principle of "that which is not explicitly allowed is explicitly denied." Attempts by anyone to access, monitor, use or share information that is not explicitly allowed to them by our security program will be considered a security violation. We will also operate on the principle of "Defense in Depth." The security of the company's information will not rely on a single means of protection when multiple means of protection are justified by our risk assessment. We will deploy systems, processes, policies and training to protect our mission critical data assets and customer privacy. Most importantly, we will monitor and enforce compliance to our policies.

Edgenuity's Security Policies address our staff, facilities, systems, and data to ensure the continued confidentiality, integrity and availability of our data and critical systems. The policies are presented in sections that focus on the needs of specific stakeholders to include: management, end users and IT staff. Please refer to the appropriate section for further information as it relates to specific systems and your individual or group responsibilities.

Roles and Responsibilities

Senior management has delegated Edgenuity's IT responsibilities to the Information Security Officer (ISO) with oversight provided by the Chief Technology Officer (CTO). The CTO and ISO will periodically provide reports to executive management to guide program adjustments.

The ISO along with the CTO, are responsible for considering the impact of any policy or procedural changes in current products and services which may affect both the security of information and functionality of products.

System users maintain individual responsibilities as outlined in the Edgenuity Security Policies. Users receive orientation training during the hiring process and are required to acknowledge their acceptance of those responsibilities in writing. The guiding principles for users include:

- Limit access to users on a "need to know" basis.
- Deploy information security safeguards in a "Defense in Depth" strategy to limit single points of potential vulnerabilities.
- Enforce accountability to Edgenuity security policies.
- Remain vigilant for new threats that may cause damage to Edgenuity or our client data and adjust the security program to control risks.
- Balance business need and support of Edgenuity's educational mission with information security requirements. Where necessary, make risk-based decisions to approve exceptions to policies or to change policies.

Security Policies Executive Summary

Vendors, partners, and other third parties are required to comply with the same standards established for Edgenuity staff. All third parties accessing Edgenuity systems and information must execute a confidentiality and non-disclosure agreement in addition to executing an agreement to provide security safeguards commensurate with the risk caused by their access to sensitive Edgenuity information and systems.

Policy Exceptions

Any exceptions to Edgenuity Information Security Policies must be documented and approved by the ISO. Documentation must include a compliance plan, including compliance dates. Exceptions are time-limited and must be re-approved on expiry.

Sanctions for Policy Violation

Absent an approved exception, failure to comply with our Information Security policies and guidelines may result in disciplinary action by Edgenuity depending upon the type and severity of the violation, whether it causes any liability or loss to the company, and/or the presence of any repeated violation(s). Each situation will be judged on a case-by-case basis. Sanctions may include termination of employment and/or referral for criminal or civil prosecution, warnings, additional security awareness training, or immediate termination. There is no requirement for advance notices, written or verbal warnings, or probationary periods.

Policy Administration

The ISO will have the responsibility for developing Information Security Policies. Security policies will be reviewed by the CTO, the General Counsel and approved by the Senior Leadership Team (CEO and direct reports). All policies will be reviewed annually and updated when there are changes to the environment. All policies are subject to review by the CTO, internal and external auditors as well as regulators.

All information security policies will include the following elements:

- Purpose
- Policy Statement
- Applicability
- Standards
