

## Wilson STEM Academy

### Replacement Project

The 2023 general obligation bond referendum presents us with a unique opportunity to enhance the learning environment and educational opportunities for our students. It aims to offer more academic options, alleviate overcrowding, and support safe schools. Here are the highlights of the project that will impact our school communities:

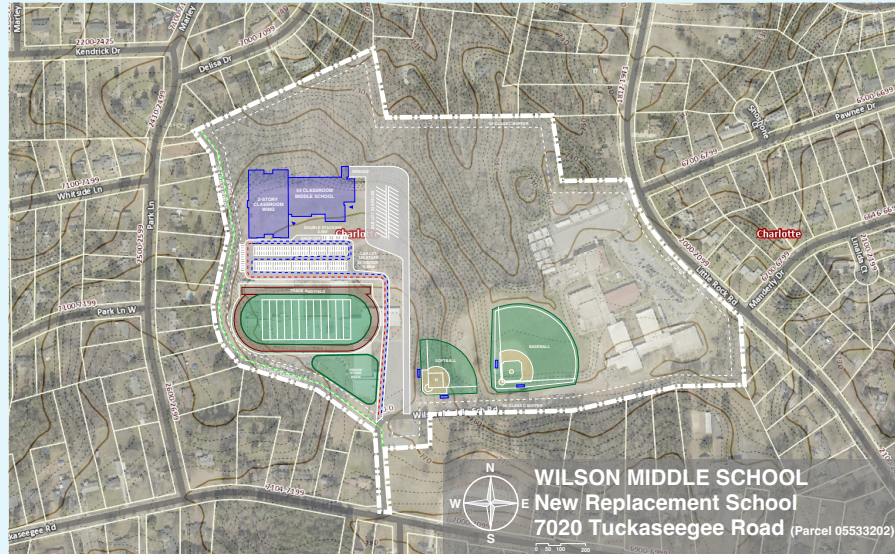

### School Board Member District 2

The Wilson STEM Academy bond project involves the onsite replacement of the current facility with a modern 54-classroom baseline school. The project aims to create an upgraded and innovative learning environment that aligns with the school's focus on science, technology, engineering, and mathematics (STEM) education. By integrating advanced infrastructure and facilities, this initiative strives to provide students with an enriching educational experience that fosters critical STEM skills and prepares them for success in the fields of science and technology at Wilson STEM Academy.

**Estimated Cost:**  
**\$92,471,565**

### Questions for CMS?
