[Michelle] My name is Michelle Yetmen. I'm a child clinical psychologist here at L.S.U. Health Shreveport in the Children's Center.	Woman (Michelle) in blue suit with red hair in front of children’s climbing apparatus Text: Michelle Yetman, P.H.D. Child Clinical Psychologist, Children’s Center
I work with children and their families who have been referred to our clinic due to concerns about their development. Most of the children referred to our clinic, there's concern about possibly having an autism spectrum disorder or A.D.H.D. or some other type of learning disability. What I like most about working here is the people I work with, the multidisciplinary team of professionals such as speech pathologist, educational diagnostician, occupational therapists and we're all really committed to helping children achieve their full potential in life.	Michelle on camera
[Adam] My name is Adam Blancher and I am a licensed psychologist here at L.S.U. Health Shreveport.	Man (Adam) in a red patterned shirt in front of an autism awareness sign Text: Adam Blancher, P.H.D. Counseling Psychologist, Children’s Center
One aspect of my job is to conduct evaluations for kids between the ages of two and 12 for a range of developmental issues, things like autism and A.D.H.D. Another aspect of my job is the training director for our clinical internship for psychologists. So this is a program where we train and educate, students who are working on their PhD to, become competent and ethical psychologists.	Adam on camera

[Mike] Hi, I'm Mike McGill, speech language pathologist and evaluation service coordinator at the Children's Center.	Man (Mike) wearing a purple and white vertical striped shirt standing in the children’s activity area Text: Michael McGill, M.C.D., C.C.C.S.L.P. Assistant Director, Children’s Center
I've been at the Children's Center for 24 years. And what I love about my job is working with like minded professionals who, evaluate and treat kids, but also give families hope and looking at children holistically. And so families leave here with a sense of what to do next, not just with an evaluation and a diagnosis.	Mike on camera
